

AE&E CZ received important boiler retrofit contract for Komorany K6 Power station

Our Czech AE&E unit won the contract for the completion of a not finished boiler after a 6 years' construction break. Meanwhile the boiler was kept conserved.

The scope of work for the customer United Energy pravni nastupce, which is owned by the J&T financial group, includes the engineering work (mainly the documentation for authority's approval for operation, delivery documentation and manuals), the status check of boiler parts and accessories, the delivery of missing parts as well as the rest of the construction work, cold and hot tests and commissioning.

The boiler steam output will be 145 t steam/h, the fuel is coal and PAC is expected for December 2007.

The contract was awarded to AE&E Czech due to the good reputation gained during the retrofit of the boiler Komorany K2 and the advanced technical offer concept.
