Austrian Energy & Environment CZ continues its successful positioning as HRSG supplier and Siemens partner

Austrian Energy & Environment CZ s.r.o. signed a contract with Siemens Industrial Turbomachinery AB for the delivery of two heat recovery steam generators to the city of Perm in Western Siberia in Russia.

For AE&E CZ the scope of supply includes the design, packing and delivery of two vertical single pressure HRSGs which will then form an integral part of a new combined heat and power unit with an overall power output of 122 MW_e and heat output of 123 MW_{th}. The new unit is built on a greenfield site adjacent to the already existing and operating Perm CHPP-6 plant.

PAC is scheduled for June 2010.

This contract is the result of a successful, long-term cooperation with Siemens Industrial Turbomachinery AB located in Finspang, Sweden.
