

## **BPE wins important first contract from leading Oil & Gas company in Brazil**

Babcock Power España signed a contract with the Consortium Skanska-Camargo Correa for the delivery of 2 x 285 t/h industrial boilers for the Petrobras refinery in Cubatao, Brazil. The fuels will be natural gas as well as refinery gas and PAC is expected for June 2009.

The Petrobras UTE Cubatao project will be managed by the Energy & Environment division of BPE, with the support of the boiler Competence Centre of AE&E Austria. Our technical superiority as well as the local presence in Brazil was crucial factors for having received the contract.

Petrobras is the leading Oil & Gas company in Brazil with major future investments in the modernisation and expansion of its energy production. This success offers an important market and new customer for our group. The involved BPE sales force has made an excellent job.
